

HYGIENE MEASURES FOR BITKOM LIVE EVENTS

Last updated: 03/08/2022

- **Legal regulations:** When hosting our events, we follow the currently applicable regulations of the state of Berlin for containing the spread of the novel coronavirus SARS-CoV-2. We adapt our hygiene measures to the recommended measures of the state.
- **Contact tracing:** All attendees are registered, enabling targeted alerting and contact tracking.
- **Contactless access:** Tickets can be presented via our app and visitors can be checked in this way.
- **Corona Warning App:** The use of the German “Corona Warnapp” is recommended, including the activation of the Bluetooth function.
- **Disinfection & cleaning:** You will find disinfection dispensers in the event area, at the toilets and outside all doors. Regularly touched surfaces will be cleaned more often throughout the event.
- **Hygiene in the sanitary facilities:** The sanitary facilities are cleaned and disinfected by the cleaning staff in short intervals. Hand washing and disinfection facilities are provided.
- **Facemasks:** This is compulsory during the entire event as soon as visitors leave a fixed seat and move within the venue. Our security personnel and staff will check that this rule is followed.
- **Ventilation:** Fresh air will be supplied to the rooms on a regular basis.
- **Non-contact routes through the venue:** All doors, except for access to the toilets and fire doors, remain permanently open.
- **Symptoms of illness among visitors:** You have the option of cancelling free of charge in the event of symptoms of illness, even shortly before the event. We will inform you about this in our mailings, too.
- **Large areas:** We have chosen the event location in such a way that we can allow more space between each individual seat. The break rooms will also be designed in a spacious way. The walkways are adapted to the current situation.
- **Business contacts & meetups:** For all personal contacts, we ask that the minimum distance of 1.5 metres be observed. Please refrain from close physical contact and from shaking hands.
- **Hygiene at the stand:** We will provide disinfectants at each stand.
- **Staff & service personnel:** They will wear a medical mask throughout the day as soon as they move within the location.
